### MICROSCOPIC EXAMINATION

Tissue blocks: 3

A positive control for each stain has been reviewed and accepted. Any immunostain(s) used were validated and their performance characteristics determined by LabGenomics. They may not be cleared or approved by the U. S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. These tests are used for clinical purposes. They should not be regarded as investigational or for research. This laboratory has been approved by CLIA 88, designated as a high-complexity laboratory and is qualified to perform these tests.
